

requests for 1-minute speeches on each side of the aisle.

#### OPPOSE THE IRAN NUCLEAR DEAL

(Mr. TROTT asked and was given permission to address the House for 1 minute.)

Mr. TROTT. Mr. Speaker, this headline is dated July 21, 2025. It is what our children and grandchildren will read in the history books in 10 years. "Due to Obama Agreement, Iran Develops Nuclear Arsenal. Rogue Nation Now Threatening To Strike United States, Destroy Israel, & Attack Other U.S. Allies."

In addition to creating a nuclear Iran, this deal will also create an arms race. It will create a means through which to finance more terrorism. It will create more tension because we only have "managed access inspections."

What this deal will not change is Iran's behavior. They will continue to hate us. They will continue to call for "death to America."

This deal is a big gamble, a gamble the United Nations is apparently willing to take, but one that we in Congress must reject.

I urge my colleagues to join me in opposing this deal. We can never allow this terrible headline to become a reality.

#### CONGRATULATING PRATT & WHITNEY ON THEIR 90TH ANNIVERSARY

(Ms. ESTY asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. ESTY. Mr. Speaker, I rise today to congratulate Pratt & Whitney on their 90th anniversary.

Since 1925, Pratt & Whitney has been a cornerstone of Connecticut's and the Nation's economy. In the last 90 years, men and women from across the country and in my State have designed and produced the most technologically advanced and dependable engines on the market.

Their F-135 engine powers Lockheed Martin's F-35 Joint Strike Fighter, and their new geared turbofan engine is setting the standard for performance in commercial aviation.

Pratt & Whitney's engineers, manufacturers, designers, and technicians have fostered Connecticut's innovation ecosystem for almost a century. We could not be more proud that they call Connecticut home.

Congratulations, Pratt & Whitney. We look forward to another 90 years of aviation leadership.

#### WE MUST ADDRESS SANCTUARY CITIES

(Mr. JOLLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOLLY. Mr. Speaker, the House will soon consider legislation to address sanctuary cities, local policies that skirt Federal policies regarding the detention of undocumented individuals who have broken the law, a policy that led recently to a terrible tragedy. We should address this. It is right we do so.

But I rise out of concern for the enforcement mechanism in the current draft of the legislation. The current draft would penalize sanctuary cities by reducing assistance to law enforcement, the very men and women we rely on each day to keep us safe.

Consider the irony. To promote greater public safety in law enforcement, we are threatening to reduce assistance to law enforcement, when it is commissions and councils that actually adopt policies regarding sanctuary cities. This is simply wrong.

We can do better. I anticipate voting for passage because we need to address this issue nationally, but I ask my colleagues today to work together. Let's replace this shortsighted provision that wrongfully punishes those who serve us each day on the front lines of law enforcement, men and women that, months ago, we lauded on this House floor during Police Week for the fine work they do.

Let's not reduce resources for law enforcement. Let's ensure that we are able to increase and continue to invest in local law enforcement.

#### SAFE AND ACCURATE FOOD LABELING ACT OF 2015

(Ms. LEE asked and was given permission to address the House for 1 minute.)

Ms. LEE. Mr. Speaker, I rise in strong opposition to H.R. 1599, which would nullify states' rights to label genetically modified organisms, commonly known as GMOs. The House will vote on this bill today.

I share the concerns of many of my constituents in California's 13th Congressional District about the proliferation of untested, genetically modified foods entering our food supply.

I also share the concerns about the risks to farmers, the environment, and public health created by the rushed commercialization of genetically engineered crops and genetically modified food products.

American consumers deserve the best information available when it comes to food choices that they make for themselves and their families. Already, some 64 nations around the world require GMO labeling.

We need to be on the side of transparency and the safety of the people we represent. That is why I support legislation like Representative PETER DEFAZIO's Genetically Engineered Food Right-to-Know Act, H.R. 913, which would require the labeling of genetically engineered foods at the Federal level.

So I hope my colleagues will defeat H.R. 1599 and move forward with Fed-

eral efforts requiring adequate and clear labeling for the foods American families are eating.

#### FINDING A CURE FOR DIABETES

(Mr. GUINTA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GUINTA. Mr. Speaker, I rise today on behalf of the 1.25 million American children and adults with type 1 diabetes.

As Members of Congress, we have the privilege of meeting with individuals from our home States advocating on various issues. All come from different backgrounds and different experiences; however, they all have one thing in common: they come to Washington looking to change our Nation.

Last week, I had the honor of meeting with 11-year-old Skye Archibald from Exeter, New Hampshire, who was in Washington as part of the Juvenile Diabetes Research Foundation's Children's Congress. Skye was diagnosed with type 1 diabetes at the young age of 9 and, since then, has been vital in changing the stigma attached with diabetes, raising money to help find a cure, and advocating at both the Federal and State level. In fact, her hard work and dedication has resulted in the signing of a bill by New Hampshire's own Governor.

It is because of bright and determined advocates like Skye that Washington can begin working better for New Hampshire. And it is because of Skye that I recently signed on to H.R. 1427, a bipartisan bill to help provide increased coverage of a vital tool that monitors sugar levels to help save the lives of those with diabetes.

#### COMMEMORATING THE LIFE AND LEGACY OF MS. TOMMIE WILLIAMS

(Mr. VEASEY asked and was given permission to address the House for 1 minute.)

Mr. VEASEY. Mr. Speaker, I rise today to commemorate the life and legacy of a very inspirational Grand Prairie resident from the Dalworth community, Ms. Tommie Williams.

Ms. Williams worked as an educator in several capacities next-door in the Arlington Independent School District. She served as a first, third, and seventh grade teacher, a basketball coach, a cheerleading sponsor, and vice president of curriculum at Sam Houston High School. In addition, Ms. Williams was the first African American administrator and the first parent to serve as a community ombudsman in the Arlington Independent School District.

In honor of her outstanding service and education, the Tommie B. Williams Elementary School in Arlington was dedicated in her honor in 1991.

Although we lost a great educator in the Arlington Independent School District and many in the Dalworth community lost a great neighbor, her
